

# CaseStudy

## Extended Service Life – Competitive Prices = Delighted Customer

We have successfully managed to extend the service life of original mixers and pumps for a Scottish company that provide raw material fuel to fire one of the largest power stations in the UK.

### CHALLENGE

worldwideengineering were called in to help with repairing pump units as their existing supplier were getting too expensive and the service levels they expected were not being met.

### OUTCOME

We have successfully delivered major cost savings with our first-class repair service. Our client even commented that he has never had a better service on these units, and that our repair costs were very, very competitive compared to other companies they have tried over the years.

Our standards are that we deliver on time, every time and that our workmanship standards are carried out to the highest specification to ensure we exceed our customers expectations and that the equipment does the job it needs to when they switch on the green for go button !

Objective Achieved – Customer Delighted!
